

# Capitalism isn't working

**Capitalism was never meant to work in the interests of working class people.** But today the system threatens the future of all life on this planet. **The only things Capitalism can offer us now are:**

- Bombs not jobs
- Hatred not healthy communities
- Austerity not investment
- Climate breakdown not sustainable development

**The Communist Party says together we can build a future for the people, not the parasites.**

**COMMUNIST PARTY OF BRITAIN**

**It doesn't have to be this way. Together we can win a socialist future, where the working class is in control.**

The Communist Party is the Marxist-Leninist Party of the organised working class in Britain. We work in our trade unions, in our communities and campaigns to defend our class against poverty, racism and misogyny. We work to build a united front of the working class, to challenge capitalist class rule – from parliament to the streets.

Join us to fight for a future that is in our hands: as the working class, for the working class. The Communist Party stands for:

- **Ending austerity - invest in renewable energy and green jobs to rebuild Britain**
- **Building new council housing**
- **Public ownership of water, energy, communications and transport**
- **Nationalising private monopolies**
- **An independent Britain; no rejoining the EU**
- **Repealing all anti-trade union laws**
- **Britain out of NATO, US bases out of Britain, British bases out of the Middle East**

**If you agree, then find out more and get involved: join the Communist Party today and join the fight for peace and socialism in our lifetime!**
